Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Molnar (4386799).

Molnar shows a main section bar (36, figure 2) of elongation conformation and provided with a longitudinal seat (the slot between 40s), a continuous support element (38) extending substantially over an entire longitudinal development of the main section bar (36) and presenting a pre-set number of attachment seats (28s) positioned at a pre-set mutual distance, the continuous support element engaging the main section bar prior to associating the moulding element to the body of the motor vehicle (figure 5), the main section bar and the support element axially fastened to each other (parts 36 and 38 frictionally engaging each other longitudinally to fasten the parts together) prior to associating the moulding element to the body of the motor vehicle.

Molnar shows all the claimed structures. The claimed method steps for the manufacturing of the molding element and for the assembling the same to a motor vehicle body would have been the obvious method steps of manufacturing of the molding element and for the assembling the same to a motor vehicle body of Molnar's structures.

Allowable Subject Matter

3. Claims 1-6, 8-15 are allowed.

Response to Arguments

4. Applicant's arguments with respect to claim 16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows vehicle moulding with support.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
